PROFESSIONAL SUMMARY

Senior Full Stack Developer with **5+ years** of experience building enterprise-grade, production web applications with **.NET Core / C#** on the back end and **Angular / TypeScript** on the front end. Strong in designing **RESTful APIs and microservices**, SQL Server performance tuning, and **Azure DevOps CI/CD**. Currently Team Lead on a SaaS platform built from scratch, owning architecture, delivery, and direct communication with an international client. Focused on shipping real-world, scalable applications — not just prototypes — and comfortable working remotely with distributed teams.

TECHNICAL SKILLS

Backend	.NET Core, ASP.NET Core Web API, C#, ASP.NET MVC, Entity Framework Core
Frontend	Angular, TypeScript, JavaScript, React.js, HTML5, CSS3
APIs & Architecture	RESTful APIs, Microservices, Inter-service Communication, Distributed Systems, SaaS
Databases	SQL Server — schema design, indexing, stored procedures, query optimisation
Cloud & DevOps	Microsoft Azure, Azure DevOps, CI/CD Pipelines, SonarQube (Code Quality & Quality Gates)
AI	Claude, GitHub Copilot, ChatGPT, Cursor
Practices	Git, Agile / Scrum, Sprint Planning, Code Review, Technical Mentoring

PROFESSIONAL EXPERIENCE

Senior Full Stack Web Developer

Sep 2023 – Present

SpryBit Softlabs · Ahmedabad, Gujarat · Hybrid

Workforce Rostering SaaS — Australia (Aug 2024 – Present) · Team Lead · Built from Scratch

- Architected a full-scale rostering SaaS platform from scratch (Deputy / Tanda scale) using **.NET Core**, **Entity Framework Core**, React.js and **Azure DevOps**.
- Designed and built the **REST API** layer powering core modules: shift scheduling, roster management, employee availability, and leave management.
- Led a team of 5 developers — sprint planning, code reviews, technical architecture decisions, and on-time delivery.
- Primary technical point of contact for the Australia-based client — managing requirements, running demos, and ensuring alignment across time zones.
- Established **CI/CD pipelines on Azure DevOps** to streamline deployments and enforce quality gates.
- Mentoring junior developers on system design, clean code, and architecture principles.

Zydus Pharmaceuticals — Microservices Platform (Jan – Jul 2024)

- Developed independent **microservices** using **.NET Core**, **Angular** and Entity Framework Core for a distributed enterprise environment.
- Implemented inter-service communication patterns and **RESTful APIs** across multiple distributed modules.

Real Estate Management Platform (Sep – Dec 2023)

- Built property listing, client management and transaction modules using **ASP.NET Core**, **C#** and **Angular**.
- Architected and optimised SQL Server schemas for complex property data relationships and reporting queries.

Full Stack Web Developer

Feb 2020 – Aug 2023

OMEX INFOTECH · Ahmedabad, Gujarat · On-site

Container Management System — Built from Scratch

- Independently architected and delivered a full Container Management System using ASP.NET MVC, **C#**, **Angular** and SQL Server.
- Built **RESTful APIs** consumed by the Angular front end for real-time container tracking and reporting.
- Designed the complete database schema for the container lifecycle: booking, dispatch, arrival and return.
- Owned the project end-to-end — requirement gathering, architecture, development and deployment.

Parts Connect — Auto Parts Management Platform

- Built complex search and filter modules in **Angular / TypeScript** for navigating inventories with millions of records.

- Applied advanced SQL Server optimisation — indexing strategies, stored procedures and query tuning — resolving critical performance bottlenecks in data-heavy modules.

Cold Storage Management System

- Enhanced inventory, temperature-log and storage-allocation modules using ASP.NET MVC and C#.
- Optimised SQL Server queries on large datasets, significantly improving report load times.

KEY ACHIEVEMENTS

- Delivered a full SaaS rostering platform from scratch — comparable in scope to Deputy and Tanda — as Team Lead, within budget and timelines.
- Led a 5-member team while directly managing communication with an Australia-based enterprise client.
- Independently architected and owned multiple .NET + Angular projects end-to-end, from requirements to production.
- Achieved significant query performance gains on multi-million-row datasets through SQL Server optimisation.

EDUCATION

Bachelor of Computer Applications (BCA) — Computer Science *2017 – 2020*

Shree Swaminarayan College of Computer Science
